TECHNICAL INFORMATION FOR TEKNO PRODUCTS.....	23
--	-----------

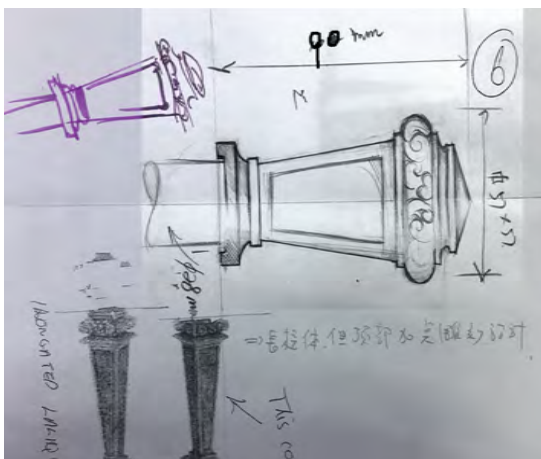

Local | Canadian | Family

In 1992, brothers Ian and Joel decided to profit from an abundance of historical metal manufacturing and workmanship knowledge existing in Montreal, Quebec. This local industry allowed Claire deco to create a leading drapery hardware company.

Since then, Claire Deco has strongly believed in the "Shop Local" philosophy long before it became a trendy term. Claire Deco has continued to develop loyal relationships with local suppliers in Quebec, Canada and North America. We believe this desire to buy local contributes to the quality of our products, which to Ian and Joel, is more important than saving a few pennies at the expense of local jobs.

Today Claire Deco can proudly claim that 70% of its products are sourced within 100km of Montreal. Not only is an attitude like this great for the local economy as it encourages local manufacturing knowledge that has been passed down through generations, but it also reduces our carbon footprint and reduces waste.

Claire Deco is proud to claim one of the **largest selections of drapery hardware in North America**, if not the largest. Due to our unique just in time inventory systems, Claire Deco can deliver over **ONE MILLION** combinations of products within a very reasonable delivery time.

Claire Deco is devoted to customer satisfaction. We take great pride in ensuring our customers have a positive experience in furnishing their homes with our products. As a family owned and operated business, we understand that the home is a special place for building lasting memories and we intend for our products to contribute to that experience.

BUILT**

**SINCE
1996**

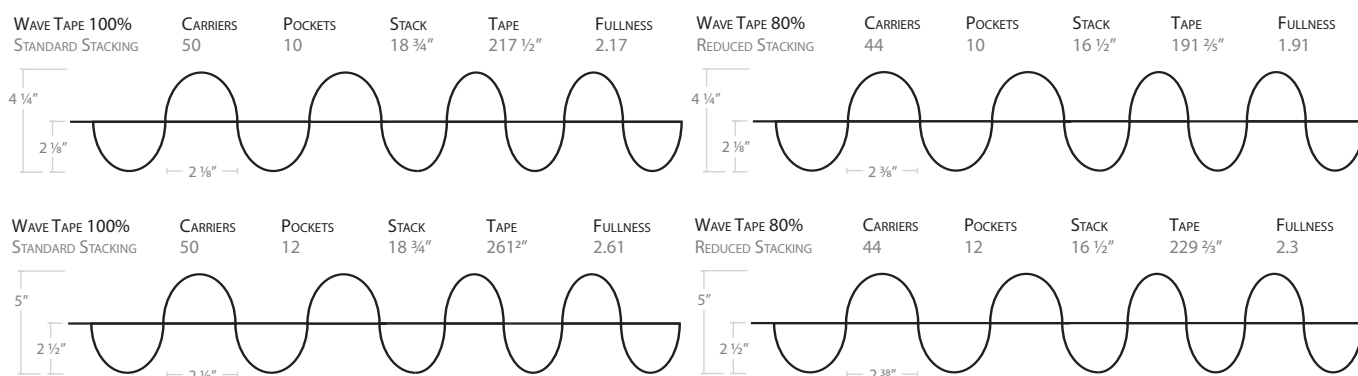

Wave Drape carriers use a unique **hook system** as opposed to the traditional snaps.

- Wave Hooks allow for more flexibility and ease of use.
- Easy installation, no force required to place hooks.
- Drapes can be washed even with hooks installed.
- Multiple fullness: 1.8 to 2.7 fullness.
- Change hook placements quickly after drape is made.

Easily compute quantities using our online wave calculator for any rod length

WAVE DRAPE ADVANTAGE™

UNOBTUSIVE DESIGN

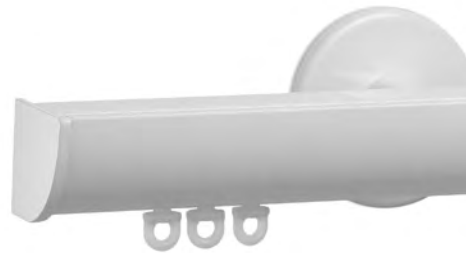

Invisible Tekno™ System was created to be compact for an unobtrusive design.

A rail installed with an **Invisible Short Projection Support** projects 1 1/2" from the wall.

A rail installed with an **Invisible Simple** or **Clic Ceiling Support** installs flush to the ceiling with zero light-gap.
